EDUCATION

The University of Chicago

Bachelor of Arts in Computer Science, Minor in Media Arts and Design

Chicago, IL

September 2023 – June 2027

EXPERIENCE

Software Engineering Intern

Summer 2026

DraftKings

Boston, MA

- Implemented and shipped production UI/UX changes using TypeScript, Next.js, and Tailwind CSS, including redesigning account information modals with distinct behavior across native and non-native environments; collaborated with designers to translate Figma designs into production interfaces.
- Contributed to an 8-person engineering team by shipping production changes, reviewing 18 PRs, and developing an automated on-call triage bot during a team hackathon to streamline incident response.

Software Developer

June 2025 – Present

UChicago Computer Science Instructional Laboratory

Chicago, IL

- Support students and maintain CS lab infrastructure by troubleshooting software and hardware issues, managing equipment, and supporting servers, internal services, and systems used for day-to-day operations.

Teaching Assistant

March 2026 – May 2026

University of Chicago (Usable Security and Privacy Course)

Chicago, IL

- Held office hours, answered student questions, graded assignments, proctored exams, and mentored students on capstone research projects, providing guidance on core computer science concepts, problem-solving, and project development.

Software Engineering Intern

Summer 2024

CharacTour

Chicago, IL

- Built a Python tool using OpenAI Whisper to scrape and process TikTok data, streamlining collection of 1,000+ video transcripts and engagement metrics for growth analysis.

LEADERSHIP

Director of Housing

January 2026 – Present

Pi Beta Phi

Chicago, IL

Website Team Lead

March 2026 – Present

UChicago Computer Science Instructional Laboratory

Chicago, IL

- Lead a complete overhaul of the lab's website, guiding a team of developers to redesign and rebuild the platform using TypeScript, Next.js, and Tailwind CSS.

PROJECTS

Photo Finish | *Playwright, Node.js, pixelmatch, Anthropic SDK*

Summer 2026

- Built a visual-regression testing pipeline from scratch using Playwright and pixelmatch, automatically capturing and comparing 65 routes across 2 viewports, 2 platforms, and 3 brands.
- Engineered deterministic screenshot capture with authenticated test sessions, API mocking, animation freezing, network stabilization, and automated handling of redirects and page-load failures.
- Integrated Claude via the Anthropic SDK to analyze visual changes and assign 0–100 regression concern scores, generating prioritized reports and detecting unintentional UI changes.

SemaDoc | *Next.js, TypeScript, Tailwind CSS, LLaMA, RAG*

Summer 2025

- Developed a responsive frontend using TypeScript, Next.js, and Tailwind CSS, supporting adoption across 8 CSIL teams and 25 student developers.
- Integrated LLaMA models with Retrieval-Augmented Generation (RAG) to generate context-aware documentation, working with a 4-person team to improve documentation workflows.
- Integrated asynchronous Trello workflows and existing APIs to automate project tracking and documentation updates.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks & Platforms: Next.js, Vue.js, ROS 2, OpenCV, Arduino, Tailwind CSS

Technologies & Tools: Git, Google Cloud Platform, Linux, Figma, Playwright, Node.js
